Kushal Sharma

Backend AI Engineer

Delhi · kushalsharma.in github.com/Kushalsharma0702 linkedin.com/in/kushalsharma0702 x.com/kushalsharma07

SUMMARY

I'm Kushal — a backend AI engineer at InTalksAI and founder of Aurocode. I build with Python and FastAPI, focusing on RAG systems and real-time voice agents, and I like turning ideas into shipped products, from AI backends to polished web apps.

EXPERIENCE

Founder · **Aurocode** Present

- Founder of Aurocode
- Live projects: TaxEase, RouteAura, Taxify

Backend AI Engineer · **InTalksAI** Present

- Real-time voice agents and RAG
- Stack: Python · FastAPI

EDUCATION

IILM University · **B.Tech · Computer Science · Class of 2027** 2023 – 2027

SELECTED PROJECTS

Voice AI Agent — Real-time voice AI agents with RAG, built in Python and FastAPI during my internship at InTalksAI.

TaxEase — A CA (chartered accountant) app for Canada: tax-filing management with a client app, an admin dashboard and a hub.
taxease-admin.vercel.app

Aurocode SyncUp — Proposal manager for sharing work with clients: admins run proposals, tasks, files and chat; clients get a read-only progress portal.
github.com/Kushalsharma0702/aurocode_syncup

GlassStats — Native macOS monitor: a transparent desktop dashboard and menu-bar readouts for CPU, memory, network, local ports and Docker.
github.com/Kushalsharma0702/Glassstats

RouteAura — A premium travel management platform: discover routes, book experiences and plan trips.
routeauraa.vercel.app

Taxify — AI-enabled portal that helps chartered accountants prepare balance sheets.
orgtaxify.netlify.app

SecureMind — AI code-vulnerability scanner: analyse code and get actionable recommendations.
securemind-nine.vercel.app

WAF — A simple and effective Web Application Firewall that protects web applications.
github.com/Kushalsharma0702/WAF-official

SKILLS

Python · FastAPI · Retrieval-augmented generation · Real-time voice agents · TypeScript · React
